PROPAK

INDUSTRIES PTY LTD - Australia
Member Packaging Council Australia

KESAB and industry partnering.

KESAB *environmental solutions* has an ongoing program of seeking out and partnering commercial enterprises whose activities have a particular environmental story to tell. That's why we are happy to recognise the SpinoWraptor from Adelaide based Propak Industries.

The SpinoWraptor.

With an estimated two million shipping pallets in Australia at any one time the SpinoWraptor takes pallet wrapping to the next level in design and efficiency with some key advances:

- ◆ Reduces stretch wrap required by up to 60%.
- ◆ Reduces roll cores required by up to 90%.
- ◆ Significantly increases load stability.
- ◆ Provides a significantly smaller disposal requirement for end users.
- ◆ Significantly reduces labour cost and lower back injury potential.

SpinoWraptor requires less than half the stretch wrap to be disposed of than conventional systems.

Free audit.

Propak can provide an obligation-free audit of your pallet wrapping facility. A written report will be prepared showing a number of key parameters including comparisons of stretch film use, costings and time savings.

To register for a free audit you can either call on 08 8443 3522, email on admin@propakindustries.com.au, visit the website at www.propakindustries.com.au or return the reply paid card.

About KESAB

Inspire. Improve. Implement. These three words summarise KESAB's mission. KESAB sees itself as a conduit... a body that enables the community to see how and why even simple actions and disciplines can play a key part in protecting the environment.

KESAB *environmental solutions* has a depth of experience in a broad range of environmentally based initiatives that is unrivalled, with connections across the State and across Australia. The scope of our programs and the expertise we have developed positions us among the best respected and most capable environmental organisations in Australia. Much of our work is ground-breaking. It is studied and emulated around the world.

We take some pride in noting that when environmental issues are raised, discussed, debated and strategies are formulated in Australia, KESAB *environmental solutions* is frequently seen as an organisation that must be consulted.

About PROPAK

Propak is an Australian company with a focus on world-class environmentally friendly packaging solutions which are proven to minimise waste.

The company is the Australasian Agent for the SpinoWraptor range of pallet wrapping machines. These machines are years ahead of the competition and have redefined OH&S standards. Field experience and audits have shown that a sound, environmentally based approach to pallet wrapping technologies and practice can have a highly beneficial impact on a range of environmental issues.

But the key factor for industry is that all this can be achieved with reduced material and labour costs.

Propak has developed a logical and thorough audit process which provides a clear and usually, stark comparison between older wrapping systems and the SpinoWraptor.

The company is pleased to partner with KESAB on this initiative because we know that KESAB has always stood for the very best environmental practices available.
